SUPPLIER TRANSPORTATION, BALANCING AND AGGREGATION - Continued

b. Elective Upstream Transmission Capacity

Transmission requirements to meet thirty-nine percent (39%) of extreme peak day usage may be served by upstream pipeline capacity obtained by the Supplier. As to such capacity, the following requirements shall apply:

- (1) Supplier must maintain seven (7) winter months (October - April) of firm capacity upstream of NFGSC sufficient to meet Supplier's extreme peak day ADDQ. Supplier shall produce proof of such contracted capacity on Company's request.
- (2) Supplier's capacity must include primary delivery points which coincide with Company's primary receipt rights on the NFGSC capacity retained by the Company. The total primary receipt point rights of elective upstream capacity into NFGSC held by the Company as of the effective date hereof are as follows:

<u>Upstream Pipeline Company Interconnect</u>	<u>Dth Rights</u>
Texas Eastern Transmission Corporation	48,880
CNG Transmission Corporation	83,065
Transcontinental Gas Pipe Line Corporation	17,398
Columbia Gas Transmission Corporation	988
National Fuel Gas Supply Corporation -- FSS	4,138

The above-listed "Dth Rights" values may be changed based on Company's contractual commitments and F.E.R.C. rules and regulations. Suppliers will receive thirty (30) days written notice of any such change, after which the value subject to such change shall be fully superseded and replaced by the noticed value.

- (3) If a Supplier requests access to a receipt point currently not available or if a receipt point is fully subscribed by other Suppliers, the Company will attempt to provide access to such receipt point, subject to operational considerations.
- (4) Suppliers using Appalachian production must request access to primary receipt points which coincide with the production area in which the Appalachian production is located.
