**SERVICE CLASSIFICATION NO. 5A**

**ON-SYSTEM LARGE VOLUME SALES SERVICES**

**Customer Eligibility**

Available to on-system customers whose anticipated normal daily use is in excess of 200 dth. An on-system customer is a customer that consumes gas at facilities located in the Company's service territory. To obtain service under this service classification, the customer must enter into a service agreement with the Company, the form of which appears on Leaf Nos. 188 to 191. Prior to the initiation of service, the customer shall elect to take either standard offer price interruptible service under Rate Schedule 1 of this service classification or individually negotiated service under Rate Schedule 2 of this service classification. Customers choosing service under Rate Schedule 2 may contract for firm or interruptible service. Customers contracting for interruptible service must have complete standby fuel and equipment available for use in the event of a service interruption, unless this requirement is waived by the Company.

Also available to the owner or operator of a natural gas compression facility ("CNG facility") located within the Company's service territory provided that the gas transported is (i) compressed at the CNG facility and injected into motor vehicle fuel tanks to be consumed as a motor fuel, and/or (ii) used at the CNG facility as compressor fuel. Such service may be firm, interruptible, or off-peak firm, as negotiated by the Customer and the Company under Rate Schedule 2. Such customers are not subject to the 200 dth restriction otherwise required.
