Cancelled by 1 Rev. Leaf No. 9 Effective 10/01/2002

RECEIVED: 04/08/98 STATUS: Cancelled EFFECTIVE: 06/01/98

SERVICE CLASSIFICATION NO. 3 (CONT'D)

MINIMUM CHARGE (per meter)

- (a) Minimum demand charge will not be less than 75% of the maximum demand during the preceding 11 months.
- (b) Applicable to all polyphase service and to single phase service when a demand meter is required (see Determination of Demand) or when an extension of lines or the installation of a new service lateral or of additional transformers is required.

DETERMINATION OF DEMAND:

Demand will be determined by meter whenever consumption for three consecutive winter billing months (November thru April) exceeds 3500 kwh or demand exceeds 20KW. Demand will be the maximum 15-minute integrated demand during the month but will not be less than 75% of the maximum demand during the preceding 11 months.

A demand meter, once installed, shall not be removed until after the energy consumption has been less than 3500 kwh per month and demand is less than 20 KW per month for twelve consecutive months, which requirement may not be avoided by temporarily terminating service.

SPECIAL PROVISIONS:

- (a) Current delivered under this classification may be used on the premises where delivered, for any purposes, at the option of the consumer, except for resale.
- (b) Service at 4160 volt primary line voltage will be supplied only to consumers who employ an electrician competent to maintain and operate 4160 volt equipment.

Issued by: Robert L. Chaffee, Director of Public Works
