GENERAL INFORMATION

10. CONDITIONS OF GAS SERVICE: (CONT'D)

F. Emergency Electric Generation:

The Company will provide new gas service where gas is to be used for emergency electric generation under the following conditions:

- (1) Only sufficient emergency electric generation may be installed to provide minimum requirements for safety and health.
- (2) The Customer will be required to pay for all additional installation costs associated with emergency electric generation service including mains and service laterals and metering if required.
- (3) When the Company has sales restrictions, customers with emergency electric generation will be penalized for excessive usage. Excessive usage will occur when the Customer exceeds his existing annual limitation for other uses plus an annual emergency electric generation allotment allowing one-half (1/2) hour testing each week and estimated use during a verifiable power outage. Any use in excess of this new annual limitation will be billed, where appropriate, at the maximum tariff penalty for unauthorized use.

G. Outdoor Gas Lighting:

The PSC has prohibited the use of natural gas in gas-fired decorative torches. A decorative torch is defined as any device in which gas is used as a fuel to produce an open flame, whether or not such flame is open to the atmosphere or enclosed in glass or other appropriate covering. Service is permitted for outdoor lighting fixtures wherein a mantle is employed that enables the gas to be converted to useful lighting.
