SERVICE CLASSIFICATION NO. 2

(Continued)

- O. Overhead street lighting facilities will not be installed in areas where there is an underground distribution system.
- P. Previous monthly bills for individual accounts shall be adjusted, as applicable, using Intra-Account Netting. Intra-Account Netting is defined as the method of computing the appropriate billing amount for a customer in a given month by offsetting equipment discovered to have been underbilled in that month against those pieces of equipment discovered to have been overbilled in that month. If by applying this method, the net result is an overbilling then a refund or credit would be issued to the customer. If the net result is an underbilling, then the recovery of that amount is subject to the applicable backbilling rules and procedures.
