DEFINITIONS:

1. The Oil Price is the average of the New York Harbor prices per barrel for large volume oil purchases of Number 6 residual oil having the sulfur content prescribed by State Regulations. The average is based upon prices in effect for the last week of the previous month and the first three weeks of the current month, and is stated in dollars per gallon of oil.

2. The Equivalent Gas-Oil Price is ninety-five percent (95%) of the Oil Price multiplied by the Conversion Factor.

3. Conversion Factor is the relationship of the Btu heat content in a gallon of No. 6 oil to the Btu heat content in one Dt of gas purchased by the Company. The Conversion Factor is 6.6667.

4. The Adjusted Commodity Cost of Gas is the Average Commodity Cost of Gas purchased during the month from the Company's supplier or suppliers plus ten (10) cents per Dt.

5. The Average Commodity Cost of Gas as used herein shall be computed monthly (except as provided for under Service Provision J) by applying the basic rates and charges (exclusive of any refund credit rates, included therein) of the Company's gas supplier or suppliers in effect as of the first day of the month for which the
