 RECEIVED: 10/22/01 STATUS: Cancelled EFFECTIVE: 11/23/02

GENERAL INFORMATION

14. GAS SUPPLY CHARGE (GSC):

A. Applicability

- (1) The GSC will be applicable to all customers taking service pursuant to Service Classification Nos. 1, 2, 5 and 9 of PSC No. 87 Gas, or superseding issues thereof.
- (2) The applicable GSC, per term of usage, will be applied to a customer's bill by prorating the GSCs in effect during the billing period based on the number of days each GSC was in effect during the billing period.

B. Monthly GSC Calculation

- (1) The GSCs will be calculated on a monthly basis.
- (2) A monthly GSC will be calculated for each applicable service classification of each Rate Area based on the applicable Gas Supply Area (GSA). The GSAs and applicable Rate Areas are:

<u>Gas Supply Area</u>	<u>Rate Area</u>
GSA 1	
Combined, Elmira, Goshen and Champlain	
GSA 2	
Binghamton and Owego	
GSA 3	
Lockport	

- (3) Each monthly GSC will be the sum of the Total Average Cost of Gas, the Supplier Refund Adjustment, the Annual Reconciliation Adjustment and other PSC approved adjustments.

C. The Total Average Cost of Gas is the sum of the Average Demand Cost of Gas, the Average Commodity Cost of Gas and the Average Indirect Costs, multiplied by the product of the Load Factor Adjustment and the Factor of Adjustment.

- (1) The Average Demand Cost of Gas shall be determined by applying the expected rates and charges of transporters, storage providers, and suppliers to the associated annualized billing determinants associated with transportation capacity, storage capacity, and supply reservation for the period during which the GSC is to be effective;
