

Valley Energy, Inc.  
New York Division

P.S.C. No. 1 Gas  
Leaf No. 94  
Revision No. 3  
Superseding Revision No. 2

SERVICE CLASSIFICATION NO. 4

INTERRUPTIBLE SERVICE

AVAILABILITY

This rate is available to any consumer located along Company's distribution lines where Company's facilities and capacity are adequate to supply consumer's requirements as set forth by written contract.

Gas shall be delivered hereunder at a single point of metering and shall not be resold.

This rate is available only on a twelve month year-around contract basis and where Consumer's gas consuming capacity is at least 20 Mcf in any twenty-four (24) hour period.

This rate is not available or applicable for gas service that would replace any "Firm" service covered by another contract with Consumer.

Service will be furnished only where Consumer has installed alternate fuel burning equipment which can be placed in operation within two hours after notification has been given by Company that gas service will be interrupted. Service under this rate will be furnished in accordance with the following stipulations and also in accordance with the Company's general rules, terms and conditions or subsequent revisions thereof on file with the New York Public Service Commission, which general rules or subsequent revisions thereof are a part of this rate as if written herein.

All customers opting to commence service under this service classification are required to have automated meter recording equipment furnished and installed by the Company at the customer's expense. The Customer agrees to prepay to the Company the cost of the automated meter recording equipment or the equipment and labor cost may be paid by Customer over a two (2) year or some lesser period by means of a monthly surcharge designed to recover the cost of the equipment plus interest equal to the Company's overall rate of return as authorized from time to time by the New York Public Service Commission. In addition, the Customer shall furnish, maintain, and pay for an electrical supply and a dedicated phone line or reimburse the Company for a wireless communication device, power supply and wireless subscription plan necessary for the operation of the equipment, in an area which is acceptable to the Company.

CHARACTER OF SERVICE:

The service furnished by Company shall be natural gas, as delivered by Company's pipeline supplier, having a heat content of approximately 1,000 Btu per cu. ft. The gas service pressure shall be adequate to operate the various commercial and industrial appliances, space heating and other equipment whose capacity and operating characteristics conform to Company standards.

INTERRUPTIBILITY OF SERVICE:

Gas service covered by this rate shall be subject to interruption or discontinuance by Company whenever, as determined by Company, an inadequate supply of gas is available to service Company's "Firm" gas consumers or whenever it is necessary to limit or control Company's system peak demands. In the event that an inadequate supply of gas exists and/or it is necessary to limit Company's system peak gas demands, service will be interrupted and discontinued by Company as long as such conditions exist.

Company will endeavor to give Consumer at least two hours notice in advance of the time that gas service will be discontinued or allocation will be increased or decreased. The notice will be provided to the individual designated by the Customer to receive such notice. The Customer is required to provide the Company with the name and phone number of the individual the Company should contact to inform the Customer of an interruption of service. As soon as Company's supply and peak load conditions permit, Company will advise Consumer promptly as to when service will be reestablished or a change in allocation will be made.
