## GENERAL INFORMATION

### 24. STANDBY SERVICE AND STANDBY SERVICE RATES (Continued)

#### 24.5 OTHER PROVISIONS (Continued)

##### (E) (Continued)

- (3) Customers with on-site generating equipment having a total nameplate rating of 50 MW or greater, where no less than 90 percent of the site's energy output, net of station power requirements, is sold into the market place or a third party, The rates and charges negotiated will reflect, when applicable, the characteristics of the specific interconnection arrangements, including, but not limited to, the voltage level of the interconnection, whether the interconnection is bi-directional, and the nature of the Company's facility where the generator is interconnected with the Company's system.

At a minimum, the negotiated rate agreement must provide for a reasonable contribution to the Company's recovery of fixed costs.

The Company shall respond to a customer application for a negotiated agreement within 60 days of its receipt, with a negotiated agreement offer or a written explanation for its rejection of the application.

- (F) A customer with a private generating facility connected to the Company's primary distribution system (as defined in General Information Section No. 4.3) may use the output of the generating facility to supply two or more Standby Service accounts, as long as all of the following conditions are met:

##### (1) Eligibility

##### (a) Standby Service Accounts

- (i) The Standby Service accounts designated by the customer and the account associated with export of the generating facility must all be established in a single customer's name ("Single Party Offset"); or

- (ii) The generating facility and the Standby Service accounts designated by the customer to receive the output of the generating facility may be established in two or more customer names ("Multi-Party Offset"), provided all of the following conditions are met:

- (1) at least one of the Standby Service accounts must be in the same customer name as the owner or operator of the generating facility (the "Sponsor") and have a contract demand equal to 10 percent or more of the nameplate rating of the generating facility;
