

P.S.C. NO. 3 ELECTRICITY**ORANGE AND ROCKLAND UTILITIES, INC.**

INITIAL EFFECTIVE DATE: May 1, 2022

Issued in compliance with Order in Case 21-E-0074 dated 4/14/2022.

LEAF: 262.1

REVISION: 3

SUPERSEDING REVISION: 1

GENERAL INFORMATION**24. STANDBY SERVICE AND STANDBY SERVICE RATES (Continued)****24.5 OTHER PROVISIONS (Continued)****(F) (Continued)**

(5) Billing Applicable to Each Account Supplied by the Generating Facility's Output (Continued)

- (d) The customer will be assessed a Reactive Power Demand Charge per kVAr registered on the generating facility's export meter(s) at the time of the maximum kW demand; provided, however, that if the meter registers no kW demand, the charge per kVAr will be applied to the highest kVAr recorded during the billing period. The applicable charge is specified in General Information Section No. 7.16(D).

(G) Standby Reliability Credit

A Standby Reliability Credit ("Credit") is available to specified Standby Service customers with generating facilities who reduce their maximum measured demand during the Measurement Period below their established contract demand level. The Credit is not available to customers served under the Value Stack Tariff as described in Rider N of this Rate Schedule, customers with Grid-connected Electric Energy Storage systems, and customers without generating facilities. To be eligible for the Credit: (a) the generating facility's output must be separately metered using an Output Meter that the customer arranges to be furnished and installed at customer expense, (b) the customer, at its expense, must provide and maintain the communications service for the Output Meter; and (c) the output of the generating facility must be connected at a voltage lower than 100 kV. The Output Meter must be Commission-approved, revenue grade, interval metering with telecommunications capability. The metering must be compatible with the Company's metering infrastructure, including compatibility with the Company's meter reading systems and meter communication systems.

For the purposes of this section, the following definitions apply:

"Measurement Period" is weekdays from 8:00 a.m. to 11:00 p.m. during the previous two consecutive full Summer Periods. The Measurement Period will exclude Outage Events, regardless of cause, as selected by the customer, as well as holidays (i.e., Independence Day (observed) if it falls on a weekday and Labor Day).
