PASNY DELIVERY SERVICE

General Provisions - Continued

Net Metering and Value Stack Tariff for PASNY Customer-Generators – Continued

Definitions, applicable to the Net Metering and Value Stack Tariff for PASNY Customer-Generators only - Continued

“Net injection” or “Net hourly injection” is the amount of excess energy produced by a PASNY Customer’s electric generating equipment beyond the PASNY Customer’s usage that is fed back to the Company’s system for a PASNY Customer served under the Value Stack Tariff.

"Non-residential Customer" is any person, corporation or other entity supplied with service and pursuant to an accepted application for service who is not a residential Customer.

“Remote Crediting” or “RC” refers to the process of applying Value Stack credits derived from the excess energy produced by a PASNY Customer’s electric generating equipment to other electric accounts pursuant to the RC conditions section of this provision.

“Remote Crediting Customer” or “RC Customer” refers to a PASNY Customer participating in an RC project that can have any number of RC Satellite Accounts that are allocated credit from an RC Host Account provided, however, that all such RC Satellite Accounts are established in a common customer name and located on properties owned or leased by the Customer.

“Remote Net Metering” or “RNM” refers to excess energy produced by a PASNY Customer’s electric generating equipment that is applied to that PASNY Customer’s other electric accounts pursuant to the RNM conditions section of this provision.

"Residential Customer" refer to any person who, pursuant to an application for service made by such person or a third party on their behalf, is supplied directly by the Company with electric service at a premises used in whole or in part as their residence where:

- a. the Schedule for Electricity specifies a residential rate;
- b. service is primarily used for the Customer's residential purposes, the Customer has so notified the Company, and the Customer is receiving service under a rate not normally used for residential service; or
- c. the Company knows or reasonably should have known that any such service is provided through a single meter to both units of a two-family dwelling;

provided, however, that no person who is supplied service to an entire multiple dwelling or for the common areas of a multiple dwelling as defined in the Multiple Dwelling Law or the Multiple Residence Law shall be considered to be a Residential Customer.

“Stand-alone Electric Energy Storage,” for the purposes of this Net Metering and Value Stack Tariff for PASNY Customer-Generators, includes regenerative braking, whether or not paired with a separate battery, and Vehicle to Grid (“V2G”) systems with a rated capacity of not more than 5,000 kW.

“Value Stack,” for the purposes of this Net Metering and Value Stack Tariff for PASNY Customer-Generators, refers to Value Stack Phase Two as described in Rider R of the Schedule for Electricity for Value Stack Capacity Components, Demand Reduction Values, and Locational System Relief Value.
