

P.S.C. No. 7 Electricity
PENNSYLVANIA ELECTRIC COMPANY
Initial Effective Date: 10/06/2019

Leaf: 38
Revision: 0
Superseding Revision:

Rule 7 - Extension of Company Facilities to Serve Customer (continued)

These costs may be modified by the Company by filing with the Commission on or before May 1 of each year. Said cost shall be based on historical costs in the previous year, twelve (12) months ended December 31 of the previous year.

Where the Company cannot be assured that the business to be served shall be permanent, or where unusual expenditures are necessary to supply electric service because of the location, size, or character of the Customer's installation, extensions shall be constructed only when Customers' contributions toward the cost of the extension, guarantee of continued payment of minimum bills, or other satisfactory arrangement is sufficient to compensate the Company for the investment and expense involved.

For Residential Applicants, the Company shall provide one hundred (100) feet of overhead or underground distribution line and/or service line without charge to each Applicant for Residential Service. The facilities provided without charge shall be measured from the Company's distribution facilities (from the connection point on the riser pole for overhead to underground service connections) to the Applicant's building. In cases where facilities are installed underground, outside of residential subdivisions solely because of an Applicant's request, the Company shall charge the actual cost of providing such facilities less the dollar value of overhead allowances which the Applicant would have received without charge. Installation of facilities as stated in this paragraph shall be by the Company.

D. Construction Service

At the request of an Applicant/Customer, the Company shall provide electric service for a defined period, usually less than one (1) year, for construction purposes only.

Upon application from an Applicant/Customer, the Company shall provide temporary service for residential single-unit house construction. For a temporary service where both the temporary service line and meter can be transferred to the completed building, the temporary service shall be provided by the Company upon the Applicant's/Customer's payment of Sixty Dollars (\$60.00). Where the temporary service requires removal and replacement with a permanent service drop, the Applicant/Customer shall pay the Company Eighty Dollars (\$80.00) in advance of such work.
