PSC NO. 4 - TELEPHONE
Interexchange Service
Effective Date: August 19, 2019

Section 3
Leaf 141
Revision: 0
Superseding Revision:

3. INTRASTATE INTEREXCHANGE SERVICES

3.4 ANCILLARY CHARGES

3.4.6 Allnet Spectrum

Allnet Spectrum is a personal communication service which allows the caller to dial an Allnet Spectrum 800 telephone and enter a four-digit personal identification routing number (PIRN) to complete a call. Allnet Spectrum service is only available in conjunction with Carrier's interstate Spectrum service offering.

As a PIRN-based product that can be shared among customers, customers are not granted exclusive use of the 800 number used for accessing the Allnet Spectrum service and thus, may not continue to use the 800 telephone number upon cancellation of their Allnet Spectrum Service.

To use Allnet Spectrum service, the caller dials the 800 telephone number for the Allnet Spectrum service. The caller may then (1) enter a PIRN which routes the call to a customer pre-designed telephone number (PIRN CALL); or (2) enter a PIRN which permits the customer to then direct dial a telephone number (DIAL TONE PIRN). Certain PIRNs are reserved for use by the Carrier under Allnet Spectrum Service or for accessing other services.

Allnet Spectrum Service is based on the time of day, length of call, and the distance in airline miles of the call. Allnet Spectrum calls are billed in six (6) second increments with a thirty (30) second minimum for each call. Any fraction of an increment is rounded up to the next whole increment. Calls made to directory assistance are charged on a per call basis as set forth in this tariff.
