Issued in compliance with Order in Case 18-E-0130 dated 09/17/2020.

---

**GENERAL INFORMATION****13. SERVICE CLASSIFICATION RIDERS (Continued)****RIDER P****TERM- AND AUTO- DYNAMIC LOAD MANAGEMENT PROGRAMS****DEFINITIONS (Continued)**

## 3. Definitions applicable to Term-DLM only

Contracted Hours refers to the four-hour period within a weekday, Monday through Friday during the Capability Period, excluding federal holidays, during which the Direct Participant or Aggregator contracts to provide Load Relief whenever the Company designates a Term-DLM Event. The Contracted Hours are established by the Company for each geographic location based on individual needs and will be posted on the Company's website no later than January 1 for the upcoming Capability Period. The Contracted Hours for any SC 15 customer who exports power to the Company shall be the Contracted Hours established by the Company for the specific geographical location unless the Company assigns an alternate four-hour period.

Renewable Generation for the purposes of this Rider means behind-the-meter electric generating equipment that is not fossil-fueled and has no emissions associated with it. Electric Energy Storage systems do not emit pollutants at their source and are therefore included under this definition.

**APPLICATION**

Participants shall enter into a Program Agreement with the Company. The ability to complete these Program Agreements is awarded based on an open, pay-as-bid, Request for Proposal ("RFP") process which considers the price per kW offered, the quantity of proposed load relief, the geographic location the load relief will be provided in, and the program the applicant is applying for. All bids will be for single Aggregations and will be considered at the Aggregation level.
