

PSC NO: 10 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 02/28/2021

Leaf: 280
Revision: 9
Superseding Revision: 8

GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER T – COMMERCIAL DEMAND RESPONSE PROGRAMS - Continued

I. Reservation Payment Option - Continued

6. Performance Factor

- a. Each Direct Participant has a monthly Performance Factor under CSRP or DLRP, as applicable under the Reservation Payment Option. Each Aggregator has a monthly Performance Factor under CSRP or DLRP, as applicable, for its portfolio enrolled in an Aggregation under the Reservation Payment Option. When more than one Load Relief Period or Test Event is called in a Network during the month, the monthly Performance Factor is the average of the individual event Performance Factors, which can range between 0 and 1.00, calculated during that month. The monthly Performance Factor is used to calculate Reservation Payments for that month and each month thereafter until the month in which the next Test Event or Load Relief Period is called by the Company in that Network during the current year's Capability Period. The monthly Performance Factor is rounded to two decimal places and has an upper limit of 1.00 and a lower limit of 0. Under CSRP, if a monthly Performance Factor is calculated to be less than or equal to 0.25, the monthly Performance Factor will be set to 0. Under DLRP, if a monthly Performance Factor is calculated to be less than or equal to 0.50, the monthly Performance Factor will be set to 0.

If, during the prior Capability Period, an Aggregator did not participate in the program for the Aggregation or if a Direct Participant either did not participate in the program or participated in the program through an Aggregator, the monthly Performance Factor will be set at 0.50 in the current Capability Period and will remain at that level until the first month in which a Load Relief Period or Test Event is called in the Network. The monthly Performance Factor determined for that month will be applied retroactively, starting with the enrollment month, to true-up the Reservation Payments for the prior month(s).

Each Direct Participant's monthly Performance Factor will carry forward to the start of the next Capability Period. An Aggregator's monthly Performance Factor for an Aggregation will carry forward to the start of the next Capability Period, even if there is a change in the Aggregation's portfolio, and will remain at that level until the first month in which a Load Relief Period or Test Event is called in the Network. The monthly Performance Factor determined for that month will be applied retroactively, starting with the enrollment month, to true-up the Reservation Payments for the prior month(s).

For Direct Participants that choose to not receive estimated payments, the monthly Performance Factor determined for the first month in which a Load Relief Period or Test Event is called in a Network will be applied retroactively, starting with the first month of the current Capability Period, to determine the Reservation Payments for the prior month(s).

- b. Performance Factor under CSRP

Individual event Performance Factor, when a Planned Event is called, is the ratio of: (i) the average hourly kW of Load Relief provided during the Contracted Hours up to the kW of contracted Load Relief to (ii) the kW of contracted Load Relief.

Issued by: Robert Hoglund, Senior Vice President & Chief Financial Officer, New York, NY
