(F/K/A SUEZ WATER OWEGO-NICHOLS)

Applicable to all Metered Customers:

According to the terms and conditions of the Commission's Order issued in Case 19-W-0168, issued and effective July 16, 2020 the existing reconciliation will recommence with the modifications described below. The rates applicable to all metered customer accounts will be subject to automatic adjustment by way of a surcharge or a credit based on the difference between the actual net revenues (operating revenues less production costs) for the preceding rate year and the net revenue target as estimated in the most recent rate case. The then-current Rate Year's net revenue variance plus any prior net revenue variances will be recovered or refunded annually through a percentage surcharge or surcredit to be applied to all metered customers' bills. This surcharge or surcredit will be based on the projected revenues from metered water sales for the next succeeding Rate Year and will be recovered or refunded during the succeeding Rate Year.

The accumulated net revenue variance will accrue interest net of income tax from the end of each Rate Year at the Other Customer Capital Rate then in effect and will be subject to any applicable local taxes.

Production costs will include the cost of sludge removal, power, chemicals and purchased water. If actual costs are less than the target for each year, 100% of the difference will be deferred and refunded through the Reconciliation. If actual costs exceed the target levels shown below, 95% of the difference for power and chemicals and 100% for purchased water and sludge removal will be deferred and recovered through the Reconciliation.

Target levels for Revenue and Production Costs are listed below:
