Leaf: 63.2
Revision: 1
Superseding Revision: 0

GENERAL RULES

6. Meters - Continued

6.10 AMR/AMI Meter Opt-out – Continued

c. Access to Premises

If a Customer opts out of AMR or AMI metering, as applicable, or refuses to permit installation of such metering, and, thereafter, the Company has no access to the meter on four consecutive bi-monthly cycle reading dates, the Customer or access controller will be required to provide the Company with access to install, or re-install, an AMR or AMI meter at the Company's discretion. As an alternative, where practicable, a Customer, at Customer expense, can furnish, install, and maintain the facilities necessary to accept outdoor metering.

Customers who opt out of AMR or AMI metering may elect to participate in AMI metering at a later date, as described on the website listed above.

6.11 Credit for AMI Non-Residential Customer-sided Communications

In certain limited circumstances where the Company determines that traditional AMI meter communications equipment on the Company's side of the meter is not sufficient for AMI meter communications at a Non-residential Customer's premises, the Company may, with the Customer's consent, install alternative equipment, such as access points or relays, on the Non-residential Customer's side of the meter to enable the AMI meter to communicate with the Company. When such equipment is installed, the Company will provide a credit of \$50 per year as long as the equipment is in service. The Non-residential Customer shall not interfere in any manner with the operation of the alternative communication equipment. In the event the alternative equipment becomes inoperable or ineffective, the Company reserves the right to revert to traditional communications equipment on the Company's side of the meter.
