

PSC NO: 12 – Electricity
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 09/17/2021
Issued in compliance with Orders in Cases 19-E-0735 and 15-E-0751 dated 07/15/2021 and 08/13/2021

Leaf: 17.3
Revision: 3
Superseding Revision: 2

PASNY DELIVERY SERVICE

General Provisions - Continued

Value Stack Tariff for PASNY Customer-Generators

Applicability:

- (1) To any PASNY Customer with solar, farm waste, fuel cell, micro-hydroelectric (“micro-hydro”) or wind electric generating equipment (as defined in Public Service Law Section 66-j and 66-l) located and used at its premises, with a rated capacity of up to 5,000 kW installed on or after the November 1, 2019; and
- (2) To any PASNY Customer with (a) biomass electric generating equipment rated up to 5,000 kW as defined in the NYSEDA Clean Energy Standard Tier 1 eligibility criteria, including biogas and liquid biofuel, with an in-service date after January 1, 2015; (b) tidal/ocean electric generating equipment rated up to 5,000 kW as defined in the NYSEDA Clean Energy Standard Tier 1 eligibility criteria, with an in-service date after January 1, 2015; (c) generating equipment rated up to 5,000 kW listed in (a) and (b) as a resource ineligible for Clean Energy Standard Tier 1 solely by virtue of having an in-service date prior to January 1, 2015; (d) Stand-alone Electric Energy Storage rated up to 5,000 kW; and (e) a Hybrid Facility installed on or after November 1, 2019. Such PASNY Customers taking service under this applicability section must also take service under SC 11 of the Schedule of Electricity.

Option (1) is not available to PASNY Customers who take service under SC 11 of the Schedule for Electricity.

The kW of facilities with generating equipment located near each other will be aggregated to determine if the kW limit is met unless each facility meets all of the following criteria: (a) each project up to the respective generating size limit must be separately metered and separately interconnected to the Company’s grid; (b) each project must be located on a separate site which can be accomplished by a project having a separate deed or a unique Section-Block-Lot (SBL) or Borough-Block-Lot (BBL) number, a separate lease, and a separate metes and bounds description recorded via either a deed or separate memorandum of lease uniquely identifying each project; and (c) each project must operate independently of the other units. The aggregated rated capacity of electric generating equipment shall be limited to 5,000 kW for PASNY Customers served under the Value Stack Tariff for PASNY Customer-Generators. PASNY Customers with eligible generating equipment installed before November 1, 2019 will have the one-time option to elect to participate under the Value Stack Tariff.

Value Stack Tariff

The Value Stack Tariff is applicable to PASNY Customers whose eligible electric generating equipment is located on the premises of an On-Site Customer, Remote Crediting (RC) Host Account, or Community Distributed Generation (CDG) Host Account, as further defined in this provision.
