53. Electric Generator Revenue Reconciliation

The Company will reconcile the difference between the electric generator revenues included in revenue requirements and the actual revenues it recovers from the electric generators at the end of each 12-month period ending March 31st. The Company will file its reconciliation for the period January 1, 2020 through March 31, 2021 in accordance with the Commission Order issued in Case No. 19-G-0309.

Electric generator revenues are delivery revenues received from customers taking service from SC 18 and SC 20.

The surcharge reconciles actual revenue to the forecast revenues reflected in rates. The surcharge will appear on Statement of Electric Generator Revenue.

Any difference would be credited or surcharged to firm sales and firm transportation customers through the delivery rate adjustment (“DRA”) for the 12-month period starting July 1st.
