

PSC NO: 15 ELECTRICITY
COMPANY: CENTRAL HUDSON GAS & ELECTRIC CORPORATION
INITIAL EFFECTIVE DATE: 09/01/21
Issued in Compliance with Order in Case 19-E-0735 dated July 15, 2021

LEAF: 163.10
REVISION: 0
SUPERSEDING REVISION:

49. REMOTE CREDITING

Applicability:

The provisions of this Section will be applicable to:

1. Existing Remote Net Metering projects compensated via the Value Stack and taking service pursuant to General Information Section 37 will be converted to Remote Crediting pursuant to this General Information Section effective with the Host's first full billing cycle after September 1, 2021;
2. New Remote Crediting projects interconnected on or after September 1, 2021; and,
3. Projects taking service under the provisions of General Information Section 37 may be eligible to make a one-time, irrevocable election to take service under the provisions of this General Information Section 49 as defined herein. Non-Value Stack RNM projects that opt into the Value Stack must adhere to the rules and requirements of Remote Crediting. Volumetric RNM projects that opt into Remote Crediting will forfeit any banked credits on the existing project before commencing with Remote Crediting, and such project's Value Stack Eligibility Date shall be the date in which the project opts into Remote Crediting.

Interconnected CDG projects, whether volumetric, monetary, Value Stack, or Net Crediting, are not eligible for Remote Crediting until such time that rules and eligibility requirements are established by the Public Service Commission for transitioning CDG projects into the Remote Crediting program.

Customer Requirements and Eligibility:

The utility billing account for electric service at the premises where the electric generating equipment is located shall be designated the Remote Crediting Host. The Remote Crediting Host must be a non-residential customer or residential customer with farm operations with qualifying electric generating equipment as defined in General Information Section 48.B. If the Remote Crediting Host Account was previously established under Remote Net Metering and not compensated via the Value Stack and subsequently opts-in to Value Stack, the project must adhere to the rules and requirements of Remote Crediting. Volumetric Remote Net Metering projects that opt into Remote Crediting will forfeit any banked credits on the existing project before commencing with Remote Crediting, and such project's Value Stack Eligibility Date shall be the date in which the project opts into Remote Crediting.

The Remote Crediting Host must certify in writing to the Company, both prior to commencing service under Remote Crediting and annually thereafter, that it has met all program criteria set forth in the Commission's Orders, including but not limited to certifying that they can satisfy all obligations assumed with respect to Satellite Account members and other requirements established by the Commission.

A Remote Crediting Host that provides a Customer's name and account number to the Company (and such other information as the Company may require if it is unable to verify the Customer's account based on the information provided), is certifying that it has written authorization from the Customer to request and receive that Customer's historical usage information and, upon enrolling a Remote Crediting Satellite Account, that it has entered into a written contract with such Customer, as applicable. The Company shall not be responsible for any contractual arrangements or other agreements between the Remote Crediting Host and Satellites, including contractual terms, pricing, dispute resolution, and contract termination.

The Host must designate the Satellite Accounts where the customer would like to apply Value Stack Credits. The Remote Crediting Host must designate no more than ten active unrelated Satellites, inclusive of any allocations to additional utility billing accounts in the Host's name, to which generation of the Host will be credited. Each Satellite may have an unlimited number of utility billing accounts provided that all utility billing accounts under a given Satellite are in the same customer name. Remote Crediting Host and Satellite Accounts must be located in the Company's service territory. Remote Crediting Hosts must notify the Company if a Remote Crediting Satellite has multiple Remote Crediting Hosts on any allocation form submitted to the Company.

Cancelled by 1 Rev. Leaf No. 163.10 Effective 09/01/2022
