## **12. ADVANCE COMMUNICATION SERVICE OFFERINGS**

### **12.5 METRO OPTICAL ETHERNET**

#### **A. General Description**

Metro Optical Ethernet (MOE) Service is a flexible, easy-to-use, transport service that uses established Ethernet transport technology. MOE allows customers to connect multiple enterprise locations within a service area using native Ethernet protocol. MOE supports transmission speeds as low as 5 Mbps and up to 1 Gbps.

#### **B. Rate Elements**

##### **1. MOE Port**

MOE Port is an Ethernet port that is the physical entry point to the shared Metro Optical Ethernet Network. Ethernet Virtual Circuits (EVCs) originate and terminate on a MOE Port. Customers may choose to connect to a 10/100 or 1,000 Mbps port on the Company network. A nonrecurring charge applies per MOE Port.

#### **C. Bandwidth Profile**

1. The Bandwidth Profile is bandwidth provisioned over the MOE Port and a monthly rate is assessed per Bandwidth Profile. Customers may subscribe to one of the following:
  - 10/100 Mbps Ports: 5 Mbps, 10 Mbps, 20 Mbps, 30 Mbps, 40 Mbps, 50 Mbps, 60 Mbps, 70 Mbps, 80 Mbps, 90 Mbps and 100 Mbps
  - 1,000 Mbps Ports: 100 Mbps, 150 Mbps, 200 Mbps, 300 Mbps, 400 Mbps, 500 Mbps, 600 Mbps, 700 Mbps, 800 Mbps, 900 Mbps and 1,000 Mbps

#### **D. Rates and Charges**

Rates and Charges for MOE will be developed on an Individual Case Basis (ICB) arrangement in response to a bona fide request for service from a customer or prospective customer. ICB rates will be offered to customers in writing and will be made available to similarly situated customers.
