4. Extensions and Move or Rearrangement of Existing Services or Facilities

- a. Under normal conditions, the Company, without charge, will extend new lines to reach residential basic local customers within the exchange service area, provided the cost of constructing the required line extension will not exceed the estimated annual basic local charges from such customer.

Additionally, in residential subdivisions having more than five units the Company will install, without charge, 25 feet per dwelling or 200 feet of feeder facilities from the boundary line of a residential subdivision equal to 25 feet per dwelling unit or 200 feet, whichever is greater]. Any charges in excess of the above ("excessive costs") will be passed on to the customer except for locations at which the Company is receiving governmental funding that covers the costs of extending service to that customer. The customer shall be apprised of any special charges for construction via a good faith estimate and will be billed only that if the actual cost is greater. The Company may pass through all costs of extending service to any customers other than basic local customers.

- b. Any moves of existing service required by any person or entity other than the Company or requested by the customer will be deemed a request to extend new lines and charged in accordance with the above unless the governmental entity requiring the move will pay for same. If the governmental move request impacts multiple customers, charges for the new line extensions will be borne equally by all impacted customers unless any individual customer has charges unusual to his or her situation.
