LOCAL EXCHANGE SERVICES TARIFF

SECTION 10 – AMERICAN LONG LINES (Cont'd)

10.5 Supplemental Services and Charges (Cont'd)

10.5.2 CLASS Services

B. Description of Features (Cont'd)

3. Repeat Dialing

The Repeat Dialing feature allows a Customer to automatically redial the last number dialed. This is accomplished by the Customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then redials the call for the Customer. The Repeat Dialing feature also allows Customers, having reached a busy number, to dial a code before hanging up. The Repeat Dialing feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically redialed and the Customer is notified of the connected call via a distinctive ring.

The following types of calls cannot be automatically redialed:

- Calls to 800 Service numbers
- Calls to 900 Service numbers
- Calls preceded by an interexchange carrier access code
- International Direct Distance Dialed calls
- Calls to Directory Assistance
- Calls to 911

4. Call Return

The Customer may either automatically return the most recent incoming call or receive an audible announcement of the telephone number, date and time of the last incoming call by dialing a special code. The Customer also has the option of having the call automatically returned for a maximum of 30 minutes without tying up the Customer's telephone. Should the line become idle during this process and the Call Return's Customer's line is available to complete the call, there is a distinctive ringing signal to alert the Customer that the call can be completed.
