LOCAL EXCHANGE SERVICES TARIFF

SECTION 10 – AMERICAN LONG LINES (Cont'd)

10.7 Business Network Switched Services (Cont'd)

10.7.2 Service Descriptions And Rates (Cont'd)

B. PBX Trunk Service (Cont'd)

1. General

Analog and/or digital PBX trunks are provided for connection of customer provided PBX terminal equipment. Analog trunks are delivered on a DS0 level and digital trunks are delivered at the DS1 level. All trunks are equipped with multiline hunting.

DID service allows callers to reach the called party without going through a PBX attendant. DOD service allows end users to dial outside of a PBX system without going through the PBX attendant to get access to an outside line. Digital trunks cannot be two-way trunks, but must be ordered as with either Direct Inward Dialing (DID) or Direct Outward Dialing (DOD).

For DID configured PBX trunks additional charges apply for DID capability and for DID Station numbers.

Automatic Identification of Outward Dialing (AIOD) provides for identification and recording of PBX station line numbers for station originated directly dialed or operator handled toll messages and for the billing of those messages by station line number through central office facilities at the serving central office. All trunks in an outgoing trunk group accessible by PBX station lines must be equipped for AIOD. DID and AIOD are not provided in the same trunk group.

Each Trunk has the following characteristics:

Terminal Interface:	2-wire or 4-wire, as required for the provision of service
Signaling Type:	Loop, Ground, E&M I, II, III
Pulse Type:	Dual Tone Multi-Frequency (DTMF)
Directionality:	In-Coming Only (DID), Out-Going Only (DOD), or Two-Way
