GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER Q –STANDBY RATE PILOT - Continued

H. Option C – Export Pilot Credit

For purposes of Section H under this Rider only, the following definitions will apply:

“Measurement Hours” are Monday through Friday, 10 AM to midnight for Customers in the 7 PM – 11 PM CSRP window. The Measurement Hours are Monday through Friday, 8 AM to 10 PM for all other Customers.

“Measurement Period” is the Measurement Hours during the previous two consecutive full Summer Periods; provided, however, that the first year in which a Customer seeks an Export Pilot Credit (“Credit”), the Measurement Period is the Measurement Hours during the previous full Summer Period only. The Measurement Period will exclude Outage Events, regardless of cause, as selected by the Customer, as well as holidays (i.e., Independence Day (observed) if it falls on a weekday and Labor Day).

“Outage Events” are up to three time blocks for each Summer Period that, in aggregate, are comprised of no more than five 24-hour periods, excluding weekends and holidays. If a time block contains a period of less than 24 hours, the time period will be rounded up to the next 24 hours (*i.e.*, the 24-hour periods cannot be applied on a partial basis). If a time block encompasses a holiday or weekend, the start of the 24-hour period on the day prior to the holiday or weekend until the same hour the next business day will be considered to be a single 24-hour time period.

“Performance Adjustment” means the lesser of: (a) the lowest kW recorded on the Output Meter during the Measurement Period or (b) the Customer’s kW of Contract Demand under SC 11 in excess of the Contract Demand billed under Standby Service rates or the Contract Demand in excess of the as-used demand billed under another rate.

“Summer Period” is June 1 through September 30.

The Credit is based on the performance of the Customer’s generation facility during a previous Measurement Period for which interval data was available from an Output Meter.

A Customer seeking a Credit must request such Credit by October 10 of each year for which the credit is sought and, at the same time, specify the Outage Events the Customer requests to be excluded from the Measurement Period. If October 10 falls on a weekend or holiday, the Company will accept requests until the next business day.

The Credit for any Measurement Period will be equal to the product of: (a) the Performance Adjustment and (b) the Contract Demand Delivery Charge per kW under SC 11 that is in effect on October 1 of the year in which the Credit is determined.

The Credit will be applied to the successive 12 monthly bills of the SC 11 account commencing in November until the following October.

The Performance Adjustment will not affect the kW used for purposes other than the Export Pilot Credit.
