

PSC NO: 10 – Electricity  
Consolidated Edison Company of New York, Inc.  
Initial Effective Date: 03/01/2018

Leaf: 278  
Revision: 7  
Superseding Revision: 6

## GENERAL RULES

### 24. Service Classification Riders (Available on Request) – Continued

#### RIDER T – COMMERCIAL DEMAND RESPONSE PROGRAMS - Continued

##### H. Voluntary Participation Option

1. The Company will make Performance Payments to a Direct Participant or Aggregator enrolled in the Voluntary Participation Option of CSRP or DLRP for Load Relief provided during a designated Load Relief Period, except as specified in section J. The Performance Payment is equal to the applicable Payment Rate multiplied by the average hourly kWh of Load Relief provided by the Direct Participant or Aggregator during the Load Relief Period multiplied by the number of hours that the Company requested Load Relief in the Network. An Aggregator's performance is measured per Network based on its entire portfolio enrolled in the Voluntary Participation Option for that Network.

The Payment Rate under CSRP is:

\$3.00 per kWh for Load Relief provided during a Planned Event; and  
\$10.00 per kWh for Load Relief provided during an Unplanned Event.

The Payment Rate under DLRP is:

\$3.00 per kWh for Load Relief provided during a Contingency Event or Immediate Event.

2. The Company will make payment under CSRP or DLRP to a Direct Participant or Aggregator after the end of the Capability Period, but no later than the end of the calendar year, for the sum of the payments due for all Load Relief Periods in the Capability Period. Payments will be made by bill credit, check, or wire transfer.

##### I. Reservation Payment Option

1. The Company will make Reservation Payments to a Direct Participant or Aggregator for each Capability Period month in which the Direct Participant or Aggregator is enrolled under CSRP or DLRP. The Reservation Payment per month is equal to the applicable Reservation Payment Rate per kW per month multiplied by the Direct Participant or Aggregator's kW of contracted Load Relief multiplied by the Performance Factor for the month (as described in paragraph 6). Reservation Payments to Aggregators are determined per Network based on the Aggregator's kW of contracted Load Relief in that Network. The first Reservation Payment for each Program will be made after the first Program-wide event is called for that Program.
2. The Company will make Performance Payments, as applicable, to a Direct Participant or Aggregator, except as specified in section J. The Performance Payment is equal to the applicable Performance Payment Rate multiplied by the average hourly kWh of Load Relief provided by the Direct Participant or Aggregator during the event multiplied by the number of event hours. Performance payments for Test Events are equal to the applicable Performance Payment Rate multiplied by the average hourly kWh of Load Relief provided by the Direct Participant or Aggregator during the Test Event up to the contracted Load Relief multiplied by the number of event hours. An Aggregator's performance is measured per Network based on its entire portfolio enrolled in the Reservation Payment Option for that Network.
