## SECTION 7 - OTHER SERVICE ARRANGEMENTS

### 7.1 Long Distance Only T-1

The Long Distance Only T-1 is a direct connection from the customer premise to Carrier's long distance facility. This connection carries interexchange traffic only, and is functionally incapable of carrying local traffic due to restrictions placed on it through Carrier's equipment. Inbound and outbound toll free calling, US LEC calling card calling, direct dial toll calling, and long distance operator services, and long distance directory assistance are all available through this facility. Customer must choose Carrier as Primary Interexchange Carrier (PIC) to subscribe to this service.

Minimum	Maximum
\$300/month	\$600

Long distance calling plans available with subscription to the Long Distance Only T-1 service are as follows:
