

P.S.C. NO. 3 ELECTRICITY	LEAF:	180.2
ORANGE AND ROCKLAND UTILITIES, INC.	REVISION:	3
INITIAL EFFECTIVE DATE: November 1, 2017	SUPERSEDING REVISION:	2

Issued in compliance with Order in Cases 15-E-0751 and 15-E-0082 dated 9/14/2017.

GENERAL INFORMATION

13. SERVICE CLASSIFICATION RIDERS (Continued)

RIDER N (Continued)

NET METERING AND VALUE STACK TARIFF FOR CUSTOMER-GENERATORS

APPLICABILITY (Continued)

Service will be provided under this Rider to customers with eligible electric generating equipment (as described above) subject to the provisions of this Rider, including the applicable Term of Service contained in this Rider, as follows:

(A) Grandfathered Net Metering

Grandfathered Net Metering is applicable to:

Customers with photovoltaic, farm waste, Micro-CHP, Micro-Hydro, and fuel cell generators on the Company's system taking service under this Rider will be classified as Grandfathered Net Metering if the total load of these types of generators did not exceed 52.1 MW (i.e., the total rated generating capacity of interconnected projects served by the Company under PSL §66-j as of the close of business on March 9, 2017, including projects to be served by the Company under PSL §66-j for which either Step 8 (for projects greater than 50 kW) or Step 4 (for projects 50 kW or less) of the SIR, as applicable, had been completed by the close of business on March 9, 2017).

This MW limit will automatically decrease as projects served under PSL §66-j are taken out of service, but will not decrease below 10.4 MW, representing 1% of the Company's 2005 electric demand level.

Customers taking service under this Rider will also be considered Grandfathered Net Metering customers if they have wind electric generating equipment, provided that the total generating capacity of wind electric generating equipment served under this provision of the Rider does not exceed 3.1 MW, representing 0.3% of the Company's 2005 electric demand level.

(B) Phase One Net Metering ("Phase One NEM")

Phase One NEM is applicable to customers not eligible for Grandfathered Net Metering that are:

- (1) Large On-Site Customers or customers whose electric generating equipment is located either on the premises of an RNM Host Account or CDG Host Account (up to 23 MW of total rated generating capacity of CDG Hosts served under Phase One NEM), provided that 25% of interconnection costs have been paid on or before July 17, 2017 or an SIR contract has been executed if no such payment is required on or before July 17, 2017;
