SECTION 3 – DESCRIPTION OF SERVICE (Cont'd)

3.7 INTRALATA TOLL PRESUBSCRIPTION

3.7.1 Application

IntraLATA Presubscription is a procedure whereby a Customer designates to the Company the IntraLATA Toll Provider (“ITP”) that the Customer wishes to be the Carrier of choice for intraLATA toll Calls. Such Calls are automatically directed to the designated Carrier without the need to use carrier access codes or additional dialing to direct the Calls to the designated Carrier. IntraLATA presubscription does not prevent a Customer who has presubscribed to an IntraLATA toll Carrier from using carrier access codes or additional dialing to direct Calls to an alternative intraLATA toll carrier on a per Call basis.

Each Carrier will have one or more access codes assigned to it for various types of service. When a Customer selects a carrier as its preferred intraLATA toll provider, only one access code of that Carrier may be incorporated into the switching system of the Company, thus permitting access to that Carrier by the Customer without dialing an access code. Should the same Customer wish to use other services of the same Carrier, it will be necessary for the Customer to dial the necessary access code(s) to reach that Carrier’s additional service(s).

An ITP must use Feature Group D (“FGD”) Switched Access Service to qualify as an intraLATA toll provider unless prior arrangements have been made with or by the Company. ITPs must submit an Access Service Request (“ASR”) prior to the intraLATA toll presubscription conversation date or prior to the date on which the Carrier proposes to begin participating in intraLATA toll presubscription, unless prior arrangements have been made with the Company.

Selection of an intraLATA toll provider by a Customer is subject to the following terms and conditions:

A. Free Initial Presubscription Selection Periods

1. Existing Customers. The Company has no existing customers, as all of its Customers will have subscribed for the Company’s local exchange service after the presubscription implementation date.
2. New End User Customers. New end user Customers or Customers that order an additional line will be asked to select a primary ITP when they place an order for the Company’s Local Exchange Service. If a customer cannot decide upon an intraLATA toll carrier at the time, the Company may extend a 30-day period following completion of the service request to make an intraLATA PIC choice without charge. In the interim, the Customer will be assigned a “No-PIC” status and will have to dial an access code to make intraLATA toll Calls.
