SECTION 7 - BUSINESS NETWORK SWITCHED SERVICES

7.2 SERVICE DESCRIPTIONS AND RATES (cont'd)

7.2.3 PBX Trunk Service

.1 General

Analog and/or digital PBX trunks are provided for connection of customer-provided PBX terminal equipment. Analog trunks are delivered on a DS0 level and digital trunks are delivered at the DS1 level. All trunks are equipped with multiline hunting.

DID service allows callers to reach the called party without going through a PBX attendant. DOD service allows end users to dial outside of a PBX system without going through the PBX attendant to get access to an outside line. Digital trunks cannot be two-way trunks, but must be ordered as with either Direct Inward Dialing (DID) or Direct Outward Dialing (DOD).

For DID configured PBX trunks additional charges apply for Direct Inward Dial Station numbers.

Each Analog Trunk has the following characteristics:

Terminal Interface:	2-wire or 4-wire, as required for the provision of service
Signaling Type:	Loop, Ground, E&M I, II, III
Pulse Type:	Dual Tone Multi-Frequency (DTMF)
Directionality:	In-Coming Only (DID), Out-Going Only (DOD), or Two-Way

.2 Message Rate Analog PBX Trunks

.1 Description

Message Rate Analog PBX Trunks provide the customer with a single, analog, voice grade telephonic communications channel which can be used to place or receive one call at a time.

Local calls on two-way trunks and DOD trunks are billed on a message rate basis. DID trunks are arranged for one-way inward calling only.
