NY PSC Tariff No. 1  
Effective Date: October 9, 2017

Section: 3  
Leaf: 6  
Revision: 0  
Superseded Revision:

---

### SECTION 3 - CONNECTION CHARGES

#### 3.6 CRITICAL FACILITIES ADMINISTRATION (CFA) SERVICE (cont'd)

##### 3. Carrier Obligations (cont'd)

- d. Updated information regarding the revised physical path of subscribed circuits would be available to the customer within 5 business days for planned actions, and within 15 business days for unplanned activities.
- e. Provision of the service would be suspended altogether in the instance of a major telephone outage. Once restored to service, current physical path information for a subscribed circuit would be developed and made available to the customer within ninety days of the restoration of service.
- f. The carrier must establish a secure database or other means that would allow the customer to obtain information of the physical path for only its subscribed circuits, subject to appropriate authentication and authorization. Where practicable, the information should be made available on a 24 hour by seven day basis.

##### Rates

Rates for CFA are based upon the time required to collect the circuit path data. The company will give the customer a good faith estimate of the time period needed to perform the requested service. The customer will be billed those charges, along with the tariff charges established by any connecting carrier for the service.

Service Order Charge Per Circuit:                      Individual Case Basis (ICB)
