## **SECTION 4 - SWITCHED ACCESS SERVICE, (Cont'd)**

### **4.2 Provision and Description of Switched Access Service Arrangements, (Cont'd)**

#### **4.2.2 Manner of Provision**

Trunks used for Switched Access Service may be configured for one-way (either originating only or terminating only) or for two-way directionality. It is the Customer's responsibility to provide the Company with a usage demand estimate for the first 3 months of service. This demand estimate should be included with the access order information.

#### **4.2.3 Call Types**

The following Switched Access Service call types are available:<sup>1</sup>

- A. Originating 101XXXX FG Access
- B. Originating 800 FG Access
- C. Terminating FG Access

#### **4.2.4 Originating 101XXXX FG Access**

The access code for FG Access switching is a uniform access code of the form 101XXXX. A single access code will be the assigned number of all FG Access provided to the Customer by the Company. When the access code is used, FG Access switching also provides for dialing the digit 0 for access to the Customer's operator service, 911 for access to emergency service, and/or the end of dialing digit (#) for cut-through access to the Customer's premises. Originating service may also be available on a presubscription basis whereby the access code is not required (i.e., "1+" dialing).

<sup>1</sup> Other supported call types may include FGA, FGB, and 500/700/900 access.

#### **4.2.5 Originating 800 FG Access**

800 Data Base Access Service is a service offering utilizing originating Trunk side Switched Access Service. When an 8XX + NXX + XXXX call is originated by an End User, the Company will perform Customer identification based on screening of the full ten-digits of the 8XX number to determine the Customer location to which the call is to be routed.

#### **4.2.6 Terminating FG Access**

FG Access, when used in the terminating direction, may only be used to access end users who are subscribing to the Company's Local Exchange Services. Calls in the terminating direction will not be completed to 950-0XXX or 950-1XXX access codes, local operator assistance (0- and 0+), Directory Assistance, (411 or 555-1212) service codes 611 and 911 and 101XXXX access codes.
