Channelization Equipment

For FGA, FGB, FGD, 500, 700, 8XX Toll Free, and 900, this PIU will be applicable to all flat and minute of use based rate elements, as applicable. In the event the Customer does not supply the projected PIU and the Company does not have sufficient call detail to determine the jurisdiction of the call, then a PIU of 50 percent will be applied.

The PIU factor provided for flat-rated services shall reflect the combination of all traffic types which transverse such facility category.

Additionally, upon employing the 700 Access Code over FGD, the Customer must provide the Company the PIU for the 700 calls. A PIU of less than 100 percent is not allowed in those LATAs where the service is not also available as an intrastate access service.

Each quarter the Customer shall furnish to the Company a report of the PIU on a statewide, LATA or billing account number level (at the option of the Customer) on a local exchange company specific basis, separately for each of the following:
