

P.S.C. NO. 3 ELECTRICITY	LEAF:	189
ORANGE AND ROCKLAND UTILITIES, INC.	REVISION:	4
INITIAL EFFECTIVE DATE: April 27, 2017	SUPERSEDING REVISION:	3

Issued in compliance with Order in Cases 15-E-0751 and 15-E-0082 dated 3/9/2017.

GENERAL INFORMATION

13. SERVICE CLASSIFICATION RIDERS (Continued)

RIDER N (Continued)

NET METERING FOR CUSTOMER GENERATORS

INTERCONNECTION AND OTHER TECHNICAL REQUIREMENTS (Continued)

- (K) Reclosers and Single Phasing - The Company practices reclosing. Lines may trip and close several times during a single disturbance. Closing may occur as quickly as 0.2 seconds or as late as five minutes following a trip. Fused circuit laterals are common on rural distribution circuits. Fused laterals increase the possibility of single-phasing. Although these reclosing and fusing practices place no additional requirements on the interconnection, the customer should consider additional protection for the generator.

TERM OF SERVICE

Unless otherwise directed by the Commission, there is no end-date to the term of service under this Rider for customers with Grandfathered Net Metering, except for RNM customers receiving monetary crediting under (C)(7) of the Billing Section of this Rider. The term of service for these customers is 25 years from the later of April 17, 2015, or the project in-service:

The term of service under this Rider is 20 years from the in-service date for all customers with Phase One NEM, unless a one-time irrevocable election was made to opt-in to the Value Stack Tariff.

Once the 20 or 25 years from the in-service date has expired, projects still in operation will be billed and credited based on the tariff that is then in effect.

At the end of the term of service, customers with on-site generation, RNM Host and RNM Satellite Accounts, and CDG Host and CDG Satellite Accounts will forfeit any remaining net metering credit that remains.
