

PSC NO: 2 ELECTRICITY

LEAF: 34

COMPANY: MASSENA ELECTRIC DEPARTMENT

REVISION: 3

EFFECTIVE DATE: 07/17/2018

SUPERSEDING REVISION: 2

Issued in compliance with the Commission's Order issued July 12, 2018 in Case 18-E-0211

SERVICE CLASSIFICATION NO. 8

Individual Service Agreements

APPLICABLE TO THE USE OF SERVICE FOR:

Electric service under this tariff is for non-residential customers who would normally be served under Service Classification No. 4 and meet all of the criteria contained in this rider. Utilizing Individual Service Agreements signed under this tariff, MED proposes to provide incentives and thus promote the location of new business ventures within MED's service territory, as well as promote the expansion of current non-residential customers.

ELIGIBILITY:

## (A) NYPA Economic Development Program

Eligible customers for this service classification are customers who develop or construct new facilities, extensively refurbish an existing or retired facility or expand production at an existing facility and the new or added demand is at least 100 kW. To be eligible to participate for this service, customers shall also meet and continue to satisfy NYPA's requirements listed in the Municipal and Rural Cooperative Industrial Economic Development Program Guidelines as they may be modified from time to time, or requirements for other NYPA Economic Development power supply programs as they may be modified from time to time, and shall work with MED to receive an allocation of additional demand and energy from NYPA. It shall be a condition precedent for service pursuant to this classification that MED receive an additional allocation of energy and demand from NYPA. Should any such additional allocation of power be changed, lessened or modified, MED reserves the right to alter the ISA or transfer the customer to S.C. No. 4 service, or other rate class available at that time.

In addition, the eligible customer must supply documentation of a viable alternative, competitive energy supplier outside of MED's service territory or show that its product offerings would be less competitive within their relevant geographic market (local, national, or international) but for the existence of the rates offered under this service classification.

## (B) High Density Load Customer Program

For those high density load customers or other customers whose energy densities are greater than 250 kWh per sq ft per year and who have a maximum demand exceeding 300 kW and have operational characteristics that would benefit MED because of location of the customer on the MED system, ability to curtail to respond to system requirements, would use underutilized MED electric facilities and would be served by market power, in whole or in part.
