PSC No: 120 - Electricity   Leaf No. 117.2.5
New York State Electric and Gas Corporation   Revision: 6
Initial Effective Date: July 16, 2018   Superseding Revision: 5

GENERAL INFORMATION

23. Wind Electric Service Options (Cont'd)
D.   Remote Net Metering (Cont'd)

  4. Calculation and Application of Net Metering Credits (cont'd)
      B.   Application of Monetary Credits
           Host Account:
           In a month where the Host Account has Excess Generation, the Excess Generation shall be converted to
           the equivalent monetary value at the per kWh rate applicable to the Host Account's service
           classification. The remote net metering credit shall first be applied to any outstanding charges on the
           Host Account's current electric bill.

           For Non-hourly Pricing customers, remote net metering credits shall be defined as the Excess
           Generation multiplied by the Host Account's applicable tariff per kWh rates.   For Hourly Pricing
           customers, as defined under Billing for Hourly Pricing customers, remote net metering credits shall be
           defined as the excess monetary credit.

           Satellite Accounts:
           Any remaining monetary credit from the Host shall be allocated to each Satellite Account in accordance
           with the Host Account designation pursuant to Section 2. The portion designated for the Satellite
           Accounts shall be applied on each Satellite Account bill as each subsequent Satellite Account bill is
           calculated. If a monetary credit remains after applying credits to all designated Satellite Accounts, the
           credit shall be carried forward on the Host Account and the allocation process between Host and
           Satellite Accounts shall repeat until the value of the excess credit is zero, or until all associated
           accounts are finaled. In the case of two Satellite Accounts billed on the same day, the excess credit
           shall be applied to the highest usage account first.

           The credit applied to each Host or Satellite Account shall not exceed the current electric delivery
           charges, and if applicable, Company supply charges.

      C.   Application of Volumetric kWh Credits:
           As each Satellite Account is billed, Excess Generation designated to the Satellite Account is converted
           to a monetary credit and applied to the per kWh charges on the Satellite Account. Monetary credits are
           calculated using the per kWh rate for the Service Classification applicable to the Satellite Account. If a
           credit remains after applying to the Satellite Account, the credit is converted back to kWh based on the
           per kWh rate for the Service Classification applicable to the Satellite Account and the kWh are
           transferred to the Host Account. This process between Host and Satellite Accounts shall repeat until
           the value of the excess credit is zero, or until all the Satellite Accounts have been billed. Any
           remaining kWh credits shall be carried forward on the Host Account to the following month.

           In the case of two Satellite Accounts billed on the same day, the excess credit shall be applied to the
           highest usage account first.

           The credit applied to each Satellite Account shall not exceed the current electric per kWh delivery
           charges, and if applicable, Company supply charges.

      D.   Upon the Company's determination that the customer has taken service under this Section 23 while in
           violation of the conditions of service set forth in this Schedule, the customer shall forfeit any positive
           balance accrued during the annual period in which the violation occurred.
