RESOLD LOCAL AND INTEREXCHANGE TELECOMMUNICATIONS TARIFF

SECTION 4 - DIGITAL DATA SERVICE (CONT'D.)

4.6 ISDN Basic Service and Virtual Serving Arrangement - General

ISDN Basic Service is available from suitable equipped digital central offices. This service is offered as a supplement to Digital Centrex II Service** and Basic Business Exchange Service. ISDN service allows for the integration of voice and non-voice (data) on a single telephone access line. (C)

ISDN service consists of a digital line which provides digital termination capabilities to the Customer's premises and allows for the simultaneous transmission of voice and data traffic. Both basic service capabilities and optional features are available.

The voice usage charges generated by using ISDN service will be identified and charged in accordance with the associated class of service with which ISDN service is used. Usage charges for circuit switched data and packet switched data are applied to all billable data calls based on existing 56 Kbps Service and Packet Switching tariffs.

4.6.1 Service Description

- A. Digital Service Line - Provides the digital Central Office termination that has the potential to support digital transmission of voice and data to the Customer's premises. This service element is required for subscribers to any of the other ISDN basic service capabilities or optional features.

Grandfathered to existing Customers at existing locations.
