P. TeraFon Service

TeraFon is a fully-integrated business service designed to meet the communication needs of businesses with outbound and/or inbound service requirements. TeraFon provides both switched and dedicated access capabilities. All services, switched and dedicated, inbound and outbound, are billed in six (6) second increments with a six (6) second minimum billing period.

TeraFon encompasses several pricing options with varying Minimum Monthly Revenue Commitments ("MMRC") that reflect common spending patterns of the business Customer. International, interstate, intrastate and calling card calls contribute to the calculation of gross monthly usage associated with the corresponding MMRC. Directory assistance and operator service charges do not apply to the calculation of gross monthly usage.

The MMRC is applied to a single access type (switched or dedicated). The MMRC may be applicable to a single service type (outbound, inbound or travel) or to a combination of the three service types (outbound, inbound and travel). An account with inbound, outbound and travel service, utilizing the same access type, will only have one MMRC.

Each TeraFon account will benefit from a 90-day ramp-up period in which to accrue sufficient usage to meet the corresponding MMRCs. Once the ramp-up period has expired, Customers billing less than the product MMRC will automatically be assessed a fee equivalent to the difference between actual gross usage and the pre-determined MMRC amount. Several TeraFon service options contain term plan agreements. Customers terminating service prior to the expiration date of their term plan agreement will be assessed the MMRC for the months remaining in the term plan agreement. The termination liability will be billed in one lump sum and payment is required within thirty (30) days of cancellation.
