

ExteNet Systems (New York), Inc.  
New York P.S.C. No. 1 – Telephone  
Effective Date: February 6, 2019

Leaf No. 10  
Revision: 0  
Superseding Revision:

---

### EXPLANATION OF TERMS (Cont'd)

#### DIRECT INWARD DIAL ("DID")

A service attribute that routes incoming calls directly to stations, by-passing a central answer point.

#### DIRECT OUTWARD DIAL ("DOD")

A service attribute that allows individual station users to access and dial outside numbers directly.

#### DISTRIBUTED ANTENNA SYSTEM ("DAS")

As used by Company, a network of components that input an RF signal from Customer equipment located at a Head End, convert it to an optical signal, transport it on fiber optic facilities to one or more remote locations, and then re-convert it back to an RF signal that is transmitted from an antenna at the remote location. This network is bi-directional, and the same components input an RF signal from an antenna at the remote location, convert it to an optical signal, transport it on fiber optic facilities to a Head End, and then re-convert it back to an RF signal that is handed off to Customer equipment located at a Head End.

#### DUAL TONE MULTI-FREQUENCY ("DTMF")

The pulse type employed by tone dial station sets. (Touch tone)

#### E911 SERVICE AREA

The geographic area in which the government agency will respond to all E911 calls and dispatch appropriate emergency assistance.

#### E911 CUSTOMER

A governmental agency that is the customer of record and is responsible for all negotiations, operations and payment of bills in connection with the provision of E911 service.

#### EXCHANGE

An area, consisting of one or more central office districts, within which a call between any two points is a local call.
