COMMERCIAL TELECOMMUNICATIONS SERVICES

SECTION 4. RATES (Cont'd)

4.10 Prepaid Debit Card Service

Prepaid debit card service is a prepaid long distance calling card service, under which Customers purchase cards in predetermined amounts for long distance usage. Customers access the service by dialing a Company specified access code. As a Customer accesses the service, usage rates and taxes are automatically deducted from the remaining card balance. Customers are notified with a usage remaining message each time a call is placed. Customers will also receive a reminder message when the balance of the card reaches one (1) minute of usage. Calls in progress will be terminated if the balance on the Pre-paid card is insufficient to cover the charges associated with the call. When the card balance reaches zero, the user must purchase another card or have the card recharged pursuant to instructions the Company provides to users purchasing the cards. Calls are billed in initial and additional one-minute increments, with any fractional portion of call rounded up to the next highest billing increment. Calls are measured and consumed on a per unit basis.

4.10.1 Per Minute Rates
