## LOCAL EXCHANGE SERVICES

### SECTION 3 - SERVICE DESCRIPTIONS (Cont'd.)

#### 3.3 Call Management Features (Continued)

##### 3.3.11 Caller ID - Number

Caller ID - Number allows the Customer to identify the calling party prior to the telephone being answered. Caller ID - Number displays the telephone number of the calling party on the Customer's CPE before the call is answered at the Customer's premises. Caller ID - Number requires a period of time equivalent to two ringing tones in order to produce the name and telephone number display on the CPE. Caller ID - Number displays non- published telephone numbers, unless the Customer who has a non-published listing activates a call identification block.

Any Customer subscribing to Caller ID - Number will be responsible for the provision of a display device which will be located on the Customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

Information transmitted via Caller ID - Number is intended solely for the use of the Caller ID - Number subscriber. Resale of this information is prohibited by this tariff. Information will not be displayed if the called party is off-hook or if the called party answers during the first ring interval. Information will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID - Number is not available on operator-handled calls.
