SECTION 4. RATES (Cont'd.)

4.87 Affinity Switched Program

Excel's Affinity Switched Program is intended for business Customers, who meet the Company's credit approval guidelines, for calling within the State of New York. This program is promoted and sold only through designated agents and dealers of Excel. Customers access Excel via Equal Access FGD circuits and/or other Switched Access Services. In order to receive the Affinity Switched Program usage rates, the Customer must be entered into the Excel billing database prior to utilizing this program. Calls are routed over Carrier's transmission and switching facilities to any valid NPA-NXX. Rates and charges for Excel's Affinity Switched Program are set forth in Section 4.87.1 following. Calls are rated based on call duration. Affinity Switched Program rates apply to direct dial, toll free (800/8XX) and calling card calls. A monthly recurring charge will also apply.

Account Codes are available under the Affinity Switched Program to assist Customers in managing and tracking their long-distance usage. Customers may select validated account codes which are specific, pre-defined combinations of digits registered with Company's switch database, and only those pre-defined codes can be used to complete a call, or Customers may select non-validated codes of a specific length and any code of that specific length can be used to complete a call.

4.87.1 Per Minute Rates

Customers of the Affinity Switched Program will be billed at the following per minute usage rate regardless of mileage and/or time of day:

	Minimum	Maximum
Direct-Dial Outbound	\$.0375	\$.1500
Inbound 800/8XX	\$.0375	\$.1500

An eighteen (18) second minimum will apply to each completed direct-dial outbound and inbound 800/8XX call, and thereafter, Customers will be billed in six (6) second increments.
