TELECOMMUNICATIONS SERVICES

SECTION 4 – TOLL SERVICES

4.1 Description of Services

4.1.1 Timing of Calls

- A. The Customer's long distance usage charge is based on the actual usage of Matrix Telecom, LLC's network. Usage begins when the called party picks up the receiver. When the called party picks up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. A call is terminated when either the called or calling party hangs up. There will be no charges for incomplete calls.
- B. The minimum call duration and initial billing period is 60 seconds for all intrastate direct dialed calls unless otherwise specified by this tariff. Any additional period is measured and rounded to the next higher 60 second increment unless otherwise specified by this tariff.

Issued By:

Charles Griffin, Chief Executive Officer, 433 East Las Colinas Blvd., Suite 500, Irving, Texas 75039

Cancelled by supplement No. 1 effective 10/20/2022
