TELECOMMUNICATIONS SERVICES

Impact Products (Continued)

5.1.3 Custom Calling Features (Continued)

O. Three-Way Calling

Three-Way Calling allows the Customer to add a third party to an established connection. When the third party answers, a two-way conversation can be held before adding the original party for a three-way conference. The end-user initiating the conference controls the call and may disconnect the third party to reestablish the original connection or establish a connection to a different third party. The feature may be used on both outgoing and incoming.

P. Touch Tone Calling

Touch Tone calling provides for the origination of calls by means of instruments equipped for tone-type address signaling and special central office facilities. The service is furnished subject to the availability of central office facilities.

All dial-type lines that terminate in an instrument equipped for tone-type address signaling shall be equipped for Touch Tone calling service except for dial-type lines served from a central office where the special facilities for Touch Tone calling service are not available.

Other facilities, miscellaneous and supplemental equipment, requested by Customers and not detrimental to this service or other services of the Company will be furnished under the regulations and at the rates specified in the applicable sections of this tariff.
