## LOCAL EXCHANGE SERVICES

### SECTION 1 - DEFINITIONS - (Continued)

**PREMISES WIRING** - All wire within a customer's premises, including connectors, jacks and miscellaneous materials associated with the wire's installation. Premises inside wire is located on the customer's side of the Company's premises protector. By definition, Customer Premises Inside Wire excludes riser, buried and aerial cable.

**PREASSIGNED NUMBER** - A telephone number preassigned before service is actually established.

**PRESUBSCRIPTION** - Presubscription is the process by which end user customers may select and designate to the Company an Interexchange Carrier (IXC) to access, without an access code, for interLATA/interstate or interLATA/intrastate calls. This IXC is referred to as the end user's predesignated IXC.

**PREWIRING** - Any inside wiring done at the location of a residence or business prior to the initial installation of telephone service.

**PRIMARY TERMINATION** - Applied to channels which extend beyond the continuous property of a customer or the confines of a single building housing the premises of more than one customer. Also, denotes the first termination of such a channel at a station or PBX on the continuous property of a customer. When more than one customer's premises is located within the same building, the first termination of such a channel at that building constitutes a "Primary Termination." For purpose of this definition, the location of a "Primary Termination" for channel services associated with "Switching System Services" is considered to be at the "Switching System Services" serving central office. When the "Switching System Services" serving central office is not in the same exchange as the main location, the "Mileage Service Area" center for the main location will be used in lieu of the "Switching System Services" serving central office.
