

PSC NO: 220 ELECTRICITY  
NIAGARA MOHAWK POWER CORPORATION  
INITIAL EFFECTIVE DATE: OCTOBER 19, 2015  
STAMPS: Issued in compliance with order in Case 15-E-0082 dated 7/17/2015

LEAF: 150  
REVISION: 5  
SUPERSEDING REVISION: 4

## GENERAL INFORMATION

### COMMUNITY DISTRIBUTED GENERATION ("CDG") (Continued)

29.3.1.1 If there is insufficient metering data in any month to ascertain the kWh supplied by the CDG Host to the CDG Satellite accounts, the CDG Host's excess credits will be assumed to be zero. When and if actual data becomes available, credits will be applied as appropriate.

29.3.1.2 The CDG Host may modify its associated CDG Satellite accounts and/or the percentage allocated to itself or to its CDG Satellites by giving notice to the Company no less than thirty days before the CDG Host account's billing date to which the modifications apply and by submitting a revised allocation request form to the Company with the new percentages and new associated CDG Satellite accounts.

29.3.1.3 If the CDG Host account is billed under energy-only rates, any remaining kWh credits on its Satellite Accounts after the CDG Host's 12-month anniversary of commencing CDG net-metered service will be returned to the CDG Host account.

29.3.1.3.1 Once each year, no less than 30 days before the 12-month anniversary date, the CDG Host must furnish the Company with instructions for distributing those credits to itself and/or one or more of its CDG Satellite accounts. No distribution will be made if instructions are not received by the required date, and any undistributed credits on the CDG Host will be forfeited.

29.3.2 If a distributed generation customer participates as a CDG Host and is billed on an energy only commercial rate, the excess generation will be allocated to the associated CDG Satellites on a volumetric basis based on the percentage directed in the application by the CDG Host.

29.3.2.1 Credits from the CDG Host will be applied to the Satellite Account(s) in their next bill. The credits from the CDG Host will be applied to the CDG Satellite account's kWh until the kWh is reduced to zero.

29.3.2.2 If a CDG Satellite account is billed under time-of-use rates, the kWh credits shall be applied in proportion to the usage in each time period.

29.3.2.3 After each CDG Satellite account has been credited, any remaining kWh credits will be carried forward on that CDG Satellite account to the succeeding billing period provided that any remaining kWh credit on the CDG Satellite account will be returned to the CDG Host Account once a year in accordance with Rule 29.3.1.3 above.

29.3.3 If a distributed generation customer participates as a CDG Host and is billed on a demand rate the excess generation will be converted to a dollar amount based on the CDG Host's Service Classification. The monetary credit will be allocated to the associated CDG Satellites based on the percentage basis directed in the application by the CDG Host.

29.3.3.1 Monetary credits from the CDG Host will be applied to the CDG Satellite account(s) in their next bill. Credits from the CDG Host will be applied to the CDG Satellite account's bill, including energy, customer, demand or other charges on its electric bill until the bill is reduced to zero.

29.3.3.2 If a CDG Satellite account is billed under time-of-use rates, the monetary credits shall be applied in proportion to the usage in each time period.
