

PSC NO: 220 ELECTRICITY
NIAGARA MOHAWK POWER CORPORATION
INITIAL EFFECTIVE DATE: OCTOBER 26, 2015
STAMPS: Issued in compliance with order in Case 15-E-0082 dated 10/16/2015

LEAF: 150
REVISION: 6
SUPERSEDING REVISION: 5

GENERAL INFORMATION

29. COMMUNITY DISTRIBUTED GENERATION ("CDG") (Continued)

29.3.1.1 If there is insufficient metering data in any month to ascertain the kWh supplied by the CDG Host to the CDG Satellite accounts, the CDG Host's excess credits will be assumed to be zero. When and if actual data becomes available, credits will be prospectively applied as appropriate.

29.3.1.2 The CDG Host may modify its associated CDG Satellite accounts and/or the percentage to its CDG Satellites by giving notice to the Company no less than thirty days before the CDG Host account's billing date to which the modifications apply and by submitting a revised allocation request form to the Company with the new percentages and new associated CDG Satellite accounts.

29.3.2 If a distributed generation customer participates as a CDG Host and is billed on an energy only commercial rate, the excess generation will be allocated to the associated CDG Satellites on a volumetric basis based on the percentage directed in the allocation request form provided to the Company by the CDG Host.

29.3.2.1 Volumetric credits received from the CDG Host to be applied to the CDG Satellite accounts will be converted to a monetary credit based on the CDG Satellite's service classification and used to reduce the volumetric charges only on the CDG Satellite's electric utility bill.

29.3.2.2 If a CDG Satellite account is billed under time-of-use rates, the credits shall be applied in proportion to the usage in each time period.

29.3.2.3 After each CDG Satellite account has been credited in the current billing period, any remaining credits will be carried forward on that CDG Satellite account to the succeeding billing period.

29.3.3 If a distributed generation customer participates as a CDG Host and is billed on a demand rate the excess generation will be converted to a dollar amount based on the CDG Host's service classification. The monetary credit will be allocated to the associated CDG Satellites based on the percentage basis as directed in the allocation request form provided to the Company by the CDG Host.

29.3.3.1 Monetary credits from the CDG Host will be applied to the CDG Satellite accounts in their next bill. Credits from the CDG Host will be applied to the CDG Satellite accounts' bill, including energy, customer, demand or other charges on the electric bill until the bill is reduced to zero.

29.3.3.2 If a CDG Satellite account is billed under time-of-use rates, the monetary credits shall be applied in proportion to the usage in each time period.

29.3.3.3 After each CDG Satellite account has been credited in the current billing period, any remaining monetary credit will be carried forward on that CDG Satellite account to the succeeding billing period.
