

Section 7 - BUSINESS NETWORK SWITCHED SERVICES

7.1 GENERAL

Business Network Switched Services provide a business customer with a connection to the Company's switching network which enables the customer to:

- A. receive calls from other stations on the public switched telephone network;
- B. access the Company's local calling service;
- C. access the Company's operators and business office for service related assistance; access toll-free telecommunications service such as 800 NPA; and access 911 service for emergency calling; and
- D. access the service of providers of interexchange service or intraLATA toll service. A customer may presubscribe to such provider's service to originate calls on a direct dialed basis or to receive 800 service from such provider, or may access a provider on an ad hoc basis by dialing the provider's Carrier Identification Code (10XXX). At the time of initial subscription, the customer shall designate a Primary Interexchange Carrier (PIC) for intra-LATA and inter-LATA toll service. If the customer does not select an intra-LATA PIC, and does not request blocking of intra-LATA toll calls, the Company shall be deemed to have been designated as the customer's intra-LATA PIC.

Business Network Switched Services is provided via one or more channels terminated at the customer's premises. Each Business Network Switched Services channel corresponds to one or more analog, voice-grade telephonic communications channels that can be used to place or receive one call at a time.

Connection charges as described in Section 2 apply to all service on a one-time basis unless waived pursuant to this Tariff.
