

PSC NO: 4 - Steam
Consolidated Edison Company of New York, Inc.
Initial Effective Date: 10/23/2015

Leaf: 49.6
Revision: 2
Superseding Revision: 1

GENERAL INFORMATION - Continued

7. Service Classification Riders (Available on Request) - Continued

RIDER G - Customer Sited Supply Pilot Program

A. Applicability and Definitions

For the purchase of steam by the Company from a Customer that has a Combined Heat and Power ("CHP") facility on its premises connected to the Company's steam system and whose primary purpose is to provide power, heating, and lighting to such premises. To participate under this Rider, the CHP facility must be a natural gas-fueled cogeneration facility that utilizes the Company's firm gas service for the delivery of gas supply to the CHP facility and captures the heat waste as a byproduct of electric production. The Customer must be billed under SC 4 for its back-up/supplementary service or isolated from the Company's steam system for its on-site steam requirements. Service is not available under this Rider to Customers that operate either a boiler-only plant (i.e., a boiler not associated with a CHP unit) or a CHP unit not associated with a host load in a building. Service under this Rider is limited to a maximum of five participants for an aggregate Contracted Export Quantity of no more than 50 Mlb/hr in any month in any operating period.

Definitions, for purpose of this Rider only:

"Anniversary Date" is the first day of the calendar month during which the Customer first exported steam to the Company.

"Contracted Export Quantity" or "CEQ" is the quantity of steam, expressed in Mlb/hr, that the Customer contracts to export in each calendar month over the 12-month period commencing on the Anniversary Date. The CEQ must be no less than 2 Mlb/hr nor more than 40 Mlb/hr. The Customer must contract to export steam during the primary operating period in all 12 months and, at the Customer's election, may contract to export steam during the secondary operating period in the months of April through November. Different CEQs may be established for each of the 12 months and for the primary and secondary operating periods in the months of April through November.

"Maximum Export Quantity" or "MEQ" is the Customer's highest CEQ approved for the 12 calendar months that commenced on the Anniversary Date.

"Primary operating period" is: (a) all hours during the calendar months of December through March, plus (b) Monday through Friday, 6 am to 6 pm, during the calendar months of April through November.

"Secondary operating period" is all hours during the calendar months of April through November except for Monday through Friday, 6 am to 6 pm.

B. Term of Service

Service under this Rider is terminable by the Customer at any time after one year of service under this Rider upon thirty days' prior written notice and by the Company in accordance with law or the provisions of this Rate Schedule. The Company may petition the Commission to terminate service under this Rider to all participants on or after December 31, 2030, if the Company deems that continuation of the program is no longer in the best interests of the Company's steam Customers.
