

Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.2 CLASS SERVICES

5.2.1 General

The features in this section are made available on an individual basis or as part of multiple feature packages. All features are provided subject to availability; features may not be available with all CLASS services. Transmission levels may not be sufficient in all cases.

5.2.2 Description of Features

A. Caller ID/Block Caller ID

The Caller ID feature allows a customer to see a caller's name and number previewed on a display screen before the call is answered allowing a customer to prioritize and or screen incoming calls. Caller ID records the name, number, date and time of each incoming call -- including calls that aren't answered by the customer. Caller ID service requires the use of specialized CPE not provided by the company. It is the responsibility of the customer to provide the necessary CPE.

B. Automatic Callback

The Automatic Callback feature allows a customer to automatically Callback the last number dialed. This is accomplished by the customer activating a code. The network periodically tests the busy/free status of the called line for up to 30 minutes until both lines are found free and then Callbacks the call for the customer.

The Automatic Callback feature also allows customers, having reached a busy number, to dial a code before hanging up. Automatic Callback feature then continues to try the busy number for up to 30 minutes until it becomes free. Once the busy line is free the call is automatically called back and the customer is notified of the connected call via a distinctive ring.

The following types of calls cannot be Automatically Called back:

- ☐ Calls to 800 Service numbers
- ☐ Calls to 900 Service numbers
- ☐ Calls preceded by an interexchange carrier access code
- ☐ International Direct Distance Dialed calls
- ☐ Calls to Directory Assistance
- ☐ Calls to 911

C. Automatic Recall

The Automatic Recall stores the number of the most recent incoming call (including unanswered incoming calls) to a customer's number. This allows a customer to dial back any missed or unanswered telephone calls.
